- Responsive to feedback.

Intelligent design with functionality

- Proactive and visionary.
- Developed in-house.
- Superb technical detail.
- Finest quality.
- Unequaled range.
- Practical yet cutting edge.

What makes an Adamsez bath so nice to bathe in

- Functionality:
- Good shoulder room.
 - Excellent depth.
 - Maximum length.
- Design:
- Contemporary styling.
 - Visually appealing.

As one of Europe's leading bath manufacturers, Adamsez produce an extensive collection of finest quality bathtubs that have been designed without compromise and manufactured to the highest standards of excellence.

Each bath has been intelligently designed to combine aesthetic appeal with total practicality allowing it to become a haven where for a moment of time the bather can escape the cares of the world while they enjoy the benefits of a luxurious soak. They have generous shoulder room to allow those tired muscles to relax, excellent depth to let the soothing warm water engulf the lower parts of the back and finally superb length to allow the bather to stretch out.

Unsurpassed for quality of design and quality of manufacture, each bath is hand made with renowned attention to detail. The inside of the bath is made from Lucite which is then heavily reinforced with fibreglass ensuring that the strength and durability of each Adamsez bath is unmatched.

Consolidated by hand and with a fully encapsulated baseboard each bath is then hand checked, individually polished and superbly packaged ready for dispatch. With its lifetime guarantee, it is this attention to detail which enables an Adamsez bath to be the finest on the market.

Vacuum formed from Lucite

- Renowned for quality and reliability.
- Superb surface finish.
