

# status

1. Your bath comes as a complete unit. It is shown here with optional towel rail
2. To remove slip-panels, gently lever off by hand. Remove fixing screws from the main panels. Slide main panels out
3. Slight adjustment of bath feet may be required to allow for floor level - ensuring panel height is accommodated. Secure feet to floor using fittings supplied (8 screws and plugs enclosed in bag attached to panel frame). Fix panel frame to floor using fittings supplied (2 screws and plugs)
4. Attach taps, waste and overflow
5. Replace main panels to bath using fixing screws removed earlier. Re-attach slip panels
